system
available.

AQUA Mate™
Portable Water Delivery System

When
the old
watering
can,
just can't.

Aquamate Model #3

Naturally, plants need water. Next to nature, you're looking at the easiest way to deliver it.

Plants, produce and flowers need water and you need a convenient method to dispense it. It doesn't matter if they're flowers you own, produce you sell or someone else's office plants, it's your responsibility. Aquamate™ watering systems will help you care for them better than any other method available.

Give the boot to old watering cans and polish up your image with a new high-tech look.

Gone are the days of gallon jugs, cracked buckets and rusted cans. The green polished finish and high-tech look of Aquamate™ machines provide watering personnel with a professional image. An image that's difficult to achieve carrying a bucket full of water or pulling a 50' hose. And because Aquamate™ machines are integrated watering systems, they eliminate the hazards associated with hauling those buckets and hoses. Your liability is reduced, you and your customers are protected and you look good on the job. So, what sounds better to you — operating a state of the art watering system or carrying around the same old can?

Aquamate Model #4

Aquamate™
M delivers.

Dumping the bucket will save you time and money.

Aquamate™ portable water delivery systems replace all the buckets, cans and hoses you have now. Our integrated system is more efficient than traditional watering methods. An Aquamate™ machine will maximize the amount of water you can carry while maintaining the plants you have. Limit your trips back and forth to the faucet and you're able to water more plants in less time with less effort.

Saving time and labor means saving money.

Watering Tubes Store Easily in Side Pouch

Removable Service Tray

Aquamate™ Model #5 — 28 gal. capacity

AQUA Mate™
Portable Water Delivery System

When
you need to
store water
for the
long haul.

*Aquamate
Model #5*

***We have the largest herd
of portable watering
systems to choose from.***

How many times have you had too much or too little water for your application. With our five sizes, you always have the right amount for your job. And you will always have a way to water those hard to reach locations. Our portable system goes anywhere you go, inside or out, and our watering tubes help you reach every corner.

***We pack them with features
and you can pack them with
everything from tools to top soil.***

Aquamate™ portable water delivery systems come complete with all the essential accessories.

All Aquamates include:

- Wand valve
- Multiple spray heads
- Two watering tubes
- Utility bag
- Service tray
- Maintenance kit

Water isn't the only thing to store in an Aquamate. Carry your hand tools in the utility bag pockets and store clippings, mulch or soil in the top tray. Our comprehensive package provides you more value for your dollar.

*Long haul or long reach—
getting water where you
need it can be a snap with
wand tubes and spray
attachments for any
application.*

Aquamate Model #4

Aquamatics has been manufacturing and selling Aquamate™ watering systems for more than 25 years. Our machines are designed to last for years and years with little maintenance.
